

Clear_Table Subroutine

Description

Clears the data or dictionary information from a table without deleting the table. This subroutine does not allow you to clear system tables.

Syntax

Clear_Table (tablename)

Parameters

The Clear_Table statement has the following parameter.

Parameter	Description
<i>tablename</i>	Specifies the name of the table to clear. By default, only the data portion of a table is cleared. To clear the dictionary portion of the table, specify "Dict.tablename".

Example

```
From the command line, this clears the CAR_PARTS table:  
run Clear_Table("CAR_PARTS")
```
