

# Properties

OLE control properties are the primary means of interacting with OLE controls. Properties, much like OI control properties, describe the persistent attributes of the control, that is, attributes having some meaningful value for the entire life of the control. Like OI control properties, OLE control properties are manipulated using the Get\_Property and Set\_Property routines. The following properties apply to the SRP Ribbon Control:

Property	Description	Version Introduced
AllowMinimize	Determines if the user is able to minimize the ribbon via the built-in context menu.	3.2
AnimationEnabled	Determines if the hot states of elements are change instantly or smoothly over a short period of time.	3.2
BackstageVisible	Determines if the backstage is visible.	3.2
CheckBoxChecked	A given check box control's checked state.	3.2
ComboList	A given combo box control's data.	3.2
ComboSelPos	A given combo box control's selected index.	3.2
ComboText	A given combo box control's current value.	3.2
CommandCaption	A given command's caption.	3.2
CommandEnabled	Determines if a given command is enabled.	3.2
ControlVisible	Determines if a given control is visible.	3.2
DateFieldValue	A given date field control's current value in OI's internal format.	3.2
EditFieldHint	The grayed text to appear within a given edit field when it is empty.	3.2
EditFieldText	A given edit field's text.	3.2
FrameThemeEnabled	Determines if the ribbon is merged into the parent window.	3.2
GroupVisible	Determines if a given group is visible.	3.2
LabelText	A given label's text.	4.0.3
MDISize	The size and location of the MDICLIENT control.	4.2.2
Minimized	Determines if the ribbon is minimized.	3.2
ProgID	The control's ProgId/Class Name.	3.2
Redraw	Determines if the ribbon redraws when a property is set.	3.2
SelectedTab	The currently active tab.	3.2
SystemButtonIsTab	Determines if the ribbon application button is the first tab on the tab bar instead of a round button in the corner.	3.2
SystemButtonCaption	The system button's caption which is only visible when the system button is a tab.	3.2
TabVisible	Determines if a given tab is visible.	3.2
Theme	The theme used to render the ribbon.	3.2
Version	The control's version info.	3.2
