Example

```
declare function FTPSEND, msg, utility

ftpdomain = 'my.ftp.site.com'
user = 'someone'
password = 'a valid password'
path = 'myFtpFiles'
filename = 'How_To_FTP'
filecontents = "Test FTP text"

ftpReply = FTPSend(ftpdomain,user,password,path,filecontents,filename,error)

if ftpReply then
    swap char(13):char(10) with '|' in ftpReply
    msg(@window,ftpReply)
end else
    if error then
        x = msg(@window, 'Contents of Error: ':error)
    end else
        x = msg(@window, 'No file returned')
    end
end
```
