

# Get\_DB\_Users Function

## Description

Returns an @fm delimited list of users in the specified application.

## Syntax

*users* = **Get\_DB\_Users** (*ApplicationName*)

## Example

```
/* display all users of the current application in a listbox
called LB_USERS */

declare function Get_DB_Users

declare subroutine Set_Property

ApplicationName = @appid<1>

Users = Get_DB_Users(ApplicationName)

Set_Property(@window: ".LB_USERS", "LIST", Users)
```
