

Get_Property Function

Description

Returns the current value of the specified property of a control.

Syntax

returnvalue = **Get_Property** (*objectname*, *property* [, *auxiliaryarg*])

SYSTEM object

There are also properties for a special "SYSTEM" object. For example,

```
ExistingProp = Get_Property( "SYSTEM", "VERSION" )
```

returns the current version of Windows, as well as of OpenInsight.

```
IdleProcStructure = Get_Property( "SYSTEM", "IDLEPROC" )
```

describes an event that has yet to execute.
