

IConv ENCRYPT_FORMAT Function

Description

Converts data strings into encrypted internal values.

Syntax

internal = **IConv**(*datastring*, "[ENCRYPT_FORMAT, *encryptKey*]")

Parameters

IConv ENCRYPT_FORMAT accepts arguments for the following parameters.

Parameter	Description
<i>dataString</i>	Any value.
<i>encryptKey</i>	The key used to encrypt the value.

Example

```
value = "AB123CD"
encryptKey = "23A23"
iValue = IConv(value, "[ENCRYPT_FORMAT, ":encryptKey:"]")
oValue = OConv(iValue, "[ENCRYPT_FORMAT, ":encryptKey:"]")
```
