Basic Training

The following articles are designed to get started with SRP FrameWorks as quickly as possible. Once you have mastered these basic subjects you will be ready to move on to more advanced concepts.

Topic	Description
Form Designing	Tips on designing forms to be used within the SRP FrameWorks environment.
Ribbon Control	Basic updating and modifying of the top Ribbon control.
Form Launching	A walk-through example on adding a new form to be launched by the MDI Frame.
Developing in SRP FrameWorks	An overview of the SRP FrameWorks development philosophy and architecture.
Adding a Form to SRP FrameWorks	A step-by-step tutorial for creating a form that works within the SRP FrameWorks architecture.
