

CreateMobReposTable Method

Syntax

```
Path = SRP_Mobile_Repository(CtrlEntID, 'CreateMobReposTable', Path, Table)
```

Returns

If table is created then 1, otherwise 0.

Parameters

Parameters	Description
Path	Directory path where the mobile repository is located.
Table	Name of table that needs to be created.

Remarks

Generally only used internally by the SRP_Mobile_Repository routine. Tables that are created are intended to store entities.

Examples

```
// Attempt to create the MOBREPOSWINS table in the mobile repository located at 'C:\MobRep'  
Success = SRP_Mobile_Repository(, 'CreateMobReposTable', 'C:\MobRep', 'MOBREPOSWINS')
```
