

FilterLocalRepository Method

Syntax

```
SRP_Mobile_Repository(CtrlEntID, 'FilterLocalRepository', EntityTypes)
```

Returns

Parameter	Description
EntityTypes	@FM list of repository types to use. If empty then the current cache is used (see RefreshLocalRepository)

Remarks

Only used internally by the SRP_Mobile_Repository routine.

Examples

```
// Filter the current display of repository entities to just OIWIN and OIWINEXE types  
SRP_Mobile_Repository(CtrlEntId, 'FilterLocalRepository', 'OIWIN' : @FM : 'OIWINEXE')
```
