Inet_FormLoad Function

Description

Internet procedure that retrieves an HTML form from the repository and fills it in with default form values.

Syntax

return = **Inet_FormLoad**(*Request*)

Parameters

Parameter	Description
Request [in]	HTTP-request that carries the following parameter: *FORM_ID* - name of a form published by HTML Publisher This function is analogous to a call to Start_Window(formID) for a database bound form. For a non-bound form, its nearly identical to the Internet procedure Inet_Repos().

Returns

HTML representation of the OpenInsight form.

Example

To launch a form **WEB_REPORT_DEMO** published using the Web Publisher, submit a URL similar to the following:

```
http://127.0.0.1/cgi-bin/oecgi.exe/INET_FORMLOAD?FORM_ID=WEB_REPORT_DEMO
```
