

EnsureVisible

Brings an item into view.

Syntax

```
rv = Send_Message(Ctrl, "OLE.EnsureVisible", Item)
```

Parameters

Parameter	Description
Item	The item to bring into view

Remarks

The EnsureVisible method brings an item into view. The Item parameter is the key to the item you wish to view. If the item is already in view, then nothing happens. Otherwise, it is scrolled into view. This method does nothing if the item's [ItemVisible](#) property is 0.

Example

```
// Bring Item1 into view  
Send_Message(@Window:".OLE_TREE", "OLE.EnsureVisible", "Item1")
```
