Inet_FormRead Function

Description

Internet procedure that reads a row from native OpenInsight table(s) and merges the retrieved data with an HTML form. The form must be registered in the Repository as a published form. Use the **Web Publishing** menu item to publish the form from the Form Designer.

Syntax

return = **Inet_FormRead**(*Request*)

Parameters

Parameter	Description
Request [in]	HTTP-request

This function is analogous to a call to Send_Event(formID, "READ").

Returns

Returns HTML representation of the OpenInsight form.

Example

In the **EXAMPLES** application, to read the row from the **PRODUCTS** table with **ID = 1-4235-24**, into the **PROD_ENTRY** form (after the form has been published), enter a URL similar to the following:

```
http://127.0.0.1/cgi-bin/oecgi.exe/INET_FORMREAD?FORM_ID=PROD_ENTRY&ID=1-4235-24
```
