Len Function

Description

Returns the number of characters in the specified string.

Syntax

length = **Len** *(expression)*

Parameters

The Len function has the following parameter.

Parameter	Description
Expression	Any legal BASIC+ expression.

Example

```
* Determine the length of REC in kilobytes (rounded up)
k = ((Len(REC)-1)/1024)+1
Call Msg(@window, "REC is " :k: "kb long.")
```
