

# RTI\_Remove\_Style\_Sheet Function

## Description

This function will remove the style sheet from the window record.

## Syntax

success = **RTI\_Remove\_Style\_Sheet** ( windowID )

## Parameters

The function has the following parameters:

Parameter	Description
windowID	A fully qualified repository id for a window

## Returns

Messages are displayed for success and failure throughout the execution of the function. The returned value from the function is 0.

## Remarks

In versions of OpenInsight prior to version 9.2, the Form Designer allowed for the attachment of a style sheet to a windows record. The style sheet caused errors when running the window.

**Note:** *This function will remove the style sheet from the window record and recompile the window.*

## Example

```
* Remove the style sheet from the CUST_ENTRY window in the EXAMPLES application
var = RTI_Remove_Style_Sheet( "EXAMPLES*OIWIN**CUST_ENTRY" )
```
