

RTI_TASK_STARTUP

Description

RTI_TASK_STARTUP starts a polling service to process background tasks.

It is a member of the RTI_TASK_xxx programs.

Syntax

```
Rslt = RTI_TASK_STARTUP(bStartPolling[, task_id])
```

Parameters

The function has the following parameters:

Parameter	Description
bStartPolling	True(1) to launch an insight.exe process to poll the task queue for pending tasks and launch them.
task_id	(Optional) The id of a specific task to launch.

Returns

Notes: *RTI_TASK_STARTUP is a supporting routine, normally called by RTI_TASK_SUBMIT. Use RTI_TASK_STARTUP if you want to launch a task or start a poller yourself. The task will use the credentials of the current user.*
