# RTI\_TASK\_STARTUP

# Description

RTI\_TASK\_STARTUP starts a polling service to process background tasks.

It is a member of the RTI\_TASK\_xxx programs.

## **Syntax**

Rslt = RTI\_TASK\_STARTUP(bStartPolling{, task\_id})

#### **Parameters**

The function has the following parameters:

Parameter	Description
bStartPolling	True(1) to launch an oinsight.exe process to poll the task queue for pending tasks and launch them.
task_id	(Optional) The id of a specific task to launch.

## Returns

Notes: RTI\_TASK\_STARTUP is a supporting routine, normally called by RTI\_TASK\_SUBMIT. Use RTI\_TASK\_STARTUP if you want to launch a task or start a poller yourself. The task will use the credentials of the current user.
