

Set_Dialog_Info Function

Description

Sets the information associated with a dialog box.

Syntax

status = **Set_Dialog_Info** (*dialogname*, *owner*, *inparam*, *ownparam*, *outparam*)

Parameters

The Set_Dialog_Info function has the following parameters.

Parameter	Description
<i>Dialogname</i>	Specify a valid window identifier.
<i>Owner</i>	The identifier for the owner window. Can be null if the dialog box exists.
<i>Inparam</i>	Input parameter (passed to CREATE event).
<i>Ownparam</i>	Parameter used by dialog box itself. Can be set using this function only.
<i>Outparam</i>	Parameter used to pass result to calling process. Set by End_Dialog.

Any delimiters except for @RM can be used as parameters. Status is true if block of parameters exists, otherwise false.
