

Set_MFS Subroutine

Description

Programmatically attach Modifying Filing Systems (MFS) to specified tables.

Syntax

Set_MFS(tablename, mfslist, action)

Parameters

The Set_MFS subroutine has the following parameters.

Parameter	Description
<i>tablename</i>	Table to which to attach the MFS.
<i>mfslist</i>	One or more (in a list) MFS to add to or remove from the table.
<i>action</i>	Action to take, regarding the MFS list:
	1) Add the MFS list to the end of the chain (just before the Base Filing System (BFS).
	2) Add the MFS list to the beginning of the chain.
	3) Add the MFS list to as close as possible to the front of the chain (just after such system MFSs as PROTECT.MFS and SI.MFS).
	4) Replace the MFSs currently attached to the table, with the list passed in mfslist.
	5) Remove list passed in mfslist, from the table.
	6) Remove all MFSs from the table.

Example

```
/* Adds RIGHTDEX.MFS to the CAR_ORDERS table, placing it just after system MFSs, in precedence. *  
Set_MFS("CAR_ORDERS", "RIGHTDEX.MFS",3)  
If Get_Status(ErrCodes) Then  
    GoSub ErrorHandler  
End
```
