

SetNoOfDelimiters Routine

Description

This routine sets the number of characters downward from 255 that should be treated as System Delimiters.

Syntax

call **SetNoOfDelimiters**(*int*)

Parameters

The function has the following parameters:

Message	Description
int	An integer value from 0 to 8. The default value is 6.

Remarks

There are times when characters within the standard system delimiter range need to be treated as characters and not delimiters. By change the number of system delimiters, the characters are treated as characters and not as delimiters.

Example

```
Declare function GetNoOfDelimiters
noDelims = GetNoOfDelimiters()
call SetNoOfDelimiters( 2 ) ; * only 255 and 254 are delimiters
call SetNoOfDelimiters( noDelims ) ; * reset to default
```
