Border

The control's border style.

Usage

```
Set_Property(OLECtrlEntID, "OLE.Border", OptionValue)
```

Values

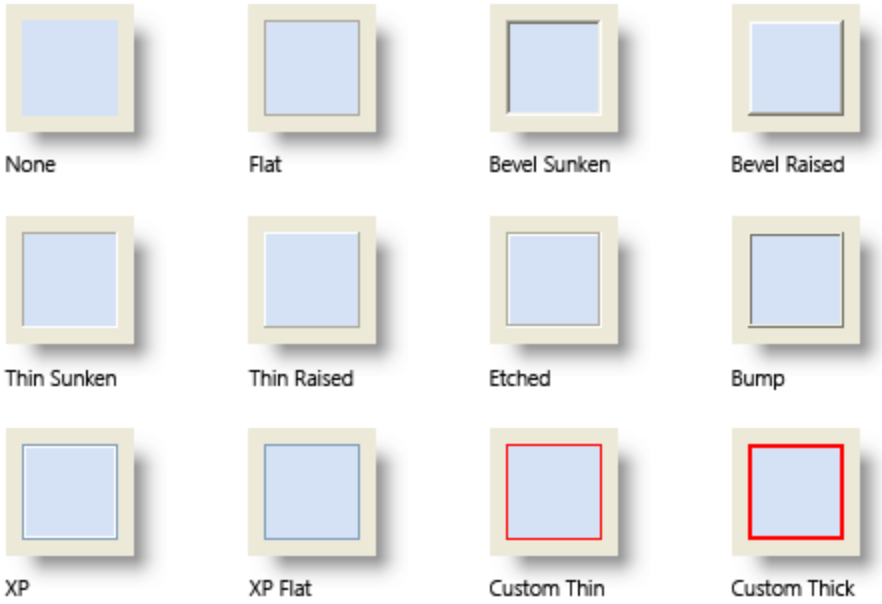
OptionValue can be set to one of the following valid options:

Value	Abbr.	Description
None	N	No border
Bevel Sunken	BS	A thick sunken border
Bevel Raised	BR	A thick raised border
Thin Sunken	TS	A thin sunken border
Thin Raised	TR	A thin raised border
Etched	ET	An etched border
Bump	B	A bumped border
Flat	F	A thin system themed border
XP	X	A 2-pixel border with a blue outline drawn in standard XP theme, or Bevel Sunken if XP themes are disabled
XP Flat	XF	A 1-pixel blue border drawn in standard XP theme, or Flat if XP themes are disabled
Custom Thin	CTN	A 1-pixel border of any color, which is determined by the BorderColors property.
Custom Thick	CTK	A 2-pixel border of any color, which is determined by the BorderColors property.

Default: None

Remarks

The Border property establishes the kind of border to appear around the edges of the control. There are several types of borders as visualized below:



Example

```
// Use the XP border
Set_Property(@Window:".OLE_CONTROL", "OLE.Border", "XP")
```
