

Screen Shots

Control Type	Description
SRP Button SRP Tab	This is a proof of concept window designed to show off the capabilities of the CaptionList and IconList properties of the SRP Button control. Each "key" is a separate SRP Button control. One of our clients needed such a feature in order to dynamically replace the character set used on the virtual keyboard. This window also uses the SRP Tab control to create a gradient background for the main window and around the radio group control.

Control Type	Description
SRP Button SRP Tab SRP EditTable SRP DatePicker SRP Picture SRP Splitter	This form created by Don Muskopf of Raining Solutions, LLC wonderfully demonstrates the flexibility of several SRP ActiveX controls. The primary component is the SRP EditTable which has been imaginatively adapted to work like a calendar control. This is achieved through creative use of hiding the CellGridLines property and applying our powerful Color Fill technology for maximum impact.
