

AUTOSIZEHEIGHT

Applies to

All controls.

Description

Returns or sets the controls autosize height status. If true, the control is autosized to the form's height. If false, the control is not autosized to the form's height.

Usage

autosizeState = **Get_Property** (*objectname*," **AUTOSIZEHEIGHT** ")

existingState = **Set_Property** (*objectname*," **AUTOSIZEHEIGHT** ",*status*)

Remarks

Values passed in Set_Property():

Value	Description
Status	Boolean true (1) or false (0)

Returns

Values returned by Get_Property and Set_Property

Value	Description
autosizeState	the Boolean status of the control's autosize height property.
existingState	the Boolean status of the control's autosize height property, when Set_Property was run.

Example

```
Declare function Get_Property, Set_Property
/* retrieve the AUTOSIZEHEIGHT property of the COMMENTS control  and if true set to false and vice versa.
autosizeState = Get_Property(@window:'.COMMENTS','AUTOSIZEHEIGHT')
if autosizeState then
newState = 0
end else
newState = 1
end
existingState = Set_Property(@window:'.COMMENTS','AUTOSIZEHEIGHT',newState)
```
