

AUTOSIZEWIDTH

Applies to

All controls.

Description

Returns or sets the controls autosize width status. If true, the control is autosized to the form's width. If false, the control is not autosized to the form's width.

Usage

```
autosizeState = Get_Property (objectname," AUTOSIZEWIDTH ")  
  
existingState = Set_Property (objectname," AUTOSIZEWIDTH ", status)
```

Remarks

Values passed in Set_Property():

Value	Description
Status	Boolean true (1) or false (0)

Returns

Values returned by Get_Property and Set_Property

Value	Description
autosizeState	the Boolean status of the control's autosize width property.
existingState	the Boolean status of the control's autosize width property, when Set_Property was run.

Example

```
Declare function Get_Property, Set_Property  
/* retrieve the AUTOSIZEWIDTH property of the COMMENTS control  and if true set to false and vice versa.  
autosizeState = Get_Property(@window:'.COMMENTS','AUTOSIZEWIDTH')  
if autosizeState then  
    newState = 0  
end else  
    newState = 1  
end  
existingState = Set_Property(@window:'.COMMENTS','AUTOSIZEWIDTH',newState)
```
