CARETPOS

Applies to

List box, edit table.

Description

Indicates the position of the caret in the control. The caret indicates the item that has the focus in a multiple-selection list box or edit table.

Usage

selecteditem = **Get_Property** (*objectname*, "**CARETPOS**")

oldselection = **Set_Property** (*objectname*, "**CARETPOS**", *newselecteditem*)

Remarks

Get_Property returns column:@FM:row for active cell in an edit table, or selected item(s) for combo and list boxes.

Set_Property sets the active cell for an edit table, or selects the row(s) for combo and list boxes.

Values passed in Set_Property are:

Value	Description
newselecteditem	Edit table: Column:@FM:Row. Combo and list boxes: ordinal position of row(s). Use -1 to indicate the last item in the list.
