

DDECOMMAND

Applies to

Edit box, edit line.

Description

Sends a command string to the server.

Usage

existingprop = **Set_Property** (*objectname*, "DDECOMMAND", *command*)

Remarks

Values passed in Set_Property:

Value	Description
Command	A command in a form recognizable to the server.

Although each DDE server-capable application can accept commands from the client, the interpretation of a command is completely dependent upon the server application. Refer to your server application for more details.

Returns

Values returned by both Get_Property and Set_Property:

Value	Description
<i>currentcommand</i>	Current service item, if any.
<i>Existingprop</i>	Name of current item, when Set_Property was run.

Note

Any command string must be enclosed between brackets.
