DDEDATA

Applies to

Edit box, edit line.

Description

Pokes or retrieves data to or from the DDE server.

Usage

existingprop = **Set_Property** (*objectname*, "**DDEDATA**", *datatoserver*)

datafromserver = **Get_Property** (*objectname*, "**DDEDATA**")

Remarks

Value passed in Set_Property:

Value	Description
Datatoserver	Data to be passed from the linked control to the DDE server.

Returns

Values returned by both Get_Property and Set_Property:

Value	Description
datafromserver	Data from the server.
existingprop	Current data, when Set_Property was run.
