

DROPACCEPT

Applies to

Drop Target controls

Description

Set to false during a DRAGOVER event to stop OpenInsight from performing data comparisons against the drop target until the control is entered again.

Usage

dropAccept = **Get_Property** (*dropTarget*, "DROPACCEPT")

existingResults = **Set_Property** (*dropTarget*, "DROPACCEPT", *bValue*)

Remarks

Values passed in Set_Property():

Value	Description
Value	A boolean true or false.

The result is reset to True at the start of every DRAGOVER event.

Returns

Values returned by Get_Property and Set_Property

Value	Description
dropAccept	A boolean true or false
existingState	the Boolean status of the control's DROPACCEPT, when Set_Property was run.

Example

```
Declare function Get_Property, Set_Property

* Only accept data being dragged from EDITLINE_1

dragSource = Get_Property("SYSTEM", "DRAGSOURCE")
if dragSource # @window:".EDITLINE_1" then
  x = Set_Property(ctrlentid, "DROPACCEPT", 0)
end
```
