

DROPSOURCE

Applies to

SYSTEM Object

Description

Contains the name of the OpenInSight control that is the "drag source" during a drag operation. For use with Get_Property only.

Usage

dragSource = **Get_Property** ("SYSTEM", "DRAGSOURCE")

Returns

The fully qualified control name.

Example

```
Declare function Get_Property

* retrieve the DROPTARGET control and display the name in a message

dragSource = Get_Property("SYSTEM", "DRAGSOURCE")

if dragSource = @window:".EDITLINE_1" then
    msg(@window, "The Drag Source control is " : dragSource)
end
```
