

DROPFORMATLIST

Applies to

Drop Target controls.

Description

Contains an @fm-delimited list of data formats accepted by the control. The list is sorted in order of preference. During DRAGOVER events the system will examine the data being dragged and compare it to the formats in this list, selecting the first match it finds.

Usage

dropFormat = **Get_Property** (*dragSource*, "DROPFORMATLIST")

Returns

An @fm-delimited list of data formats being dragged.

Remarks

Control Type	Formats	Notes
BITMAP	BITMAP	
	FILENAME	if applicable
COMBOBOX(Item)	TEXT	
COMBOBOX(List)	OI_LIST	@fm-delimited list
	TEXT	CRLF-delimited list
