

DROPRESULT

Applies to

Drop Target controls

Description

The DropResult property is set to prevent OpenInsight from performing any default data copy or move operations after the DRAGROP event returns.

Usage

dropResult = **Get_Property** (*dropSource*, "DROPRESULT")

existingResults = **Set_Property** (*dropSource*, "DROPRESULT", *value*)

Remarks

Values passed in Set_Property():

Value	Description
Value	"MOVE" or "COPY"

This property can only be set during a DRAGDROP event. The result is reset to null at the start of every DRAGDROP event.

Note: *If the DROPRESULT property is set all drag and drop activity must be handled by the programmer and not OpenInsight.*

Returns

Values returned by Get_Property and Set_Property

Value	Description
dropResult	MOVE or COPY.
existingState	the status of the control's DROPMOVE property, when Set_Property was run.

Example

```
Declare function Get_Property, Set_Property

* Set the DROPRESULT property

dropTarget = Get_Property("SYSTEM", "DROPTARGET")
dropResult = Set_Property(dropTarget, "DROPRESULT", "MOVE")
```
