

ENABLEDRAG

Applies to

All Controls except OLE controls.

Description

A boolean property to allow data to be dragged from that control.

Usage

enableDrag = **Get_Property** (*objectname*,**"ENABLEDRAG"**)

enableDrag = **Set_Property** (*objectname*,**"ENABLEDRAG"**, *bValue*)

Remarks

Values passed in Set_Property():

Value	Description
bValue	Boolean true (1) or false (0)

Returns

Values returned by Get_Property and Set_Property

Value	Description
state	the Boolean status of the control's drag ability.
existingState	the Boolean status of the control's drag ability, when Set_Property was run.

Additional Remarks

To enable drag and drop within editable columns the ColStyle Message needs to be used. See [ColStyle message](#)

Example

```
Declare function Get_Property, Set_Property

/* retrieve the ENABLEDRAG property of the EDITLINE_1 control and if true set to false and vice versa.

enableDrag = Get_Property(@window:'.EDITLINE_1','ENABLEDRAG')
if enableDrag then newDrag = 0 else newDrag = 1
enableDrag = Set_Property(@window:'.EDITLINE_1','ENABLEDRAG',newDrag)
```
