

ENABLEDROPSROLL

Applies to

All Controls except OLE controls.

Description

A boolean property to allow the control to respond to mouse hover notifications while data is dragged over the control. The control needs to have the ENABLEDROPS property set to true to enable this property.

Usage

enableDropScroll = **Get_Property** (*objectname*, "ENABLEDROPSROLL")

enableDropScroll = **Set_Property** (*objectname*, "ENABLEDROPSROLL", *bValue*)

Remarks

Values passed in Set_Property():

| Value | Description |
|--------|-------------------------------|
| bValue | Boolean true (1) or false (0) |

Returns

Values returned by Get_Property and Set_Property

| Value | Description |
|---------------|--|
| state | the Boolean status of the control's drop hover ability. |
| existingState | the Boolean status of the control's drop hover ability, when Set_Property was run. |

Example

```
Declare function Get_Property, Set_Property

* retrieve the ENABLEDROPSROLL property of the EDITLINE_1 control and if true set to false and vice versa.

dropScroll = Get_Property(@window:'.EDITLINE_1','ENABLEDROPSROLL')

if dropScroll then newScroll = 0 else newScroll = 1

dropScroll = Set_Property(@window:'.EDITLINE_1','ENABLEDROPSROLL',newScroll)
```
