

# FOCUSCELLFONT

## Applies to

Edit table.

## Description

Defines the font to use for the cell that currently has focus within the edit table.

## Usage

*gFocusCellFont* = **Get\_Property** (*editTable*, "FOCUSCELLFONT")

*sFocusCellFont* = **Set\_Property** (*editTable*, "FOCUSCELLFONT", *fontStruct*)

## Remarks

Values passed in Set\_Property():

Value	Description
fontStruct	The standard OpenInsight font structure. Refer to the FONT property for details.

## Returns

Values returned by Get\_Property and Set\_Property

Value	Description
gFocusCellFont	Returns the current font of the cell with focus.
sFocusCellFont	Returns the font of the cell prior to the setting of the new font.

## Example

```
Declare function Get_Property, Set_Property

* Set the font of the cell that has focus within an edit table to its existing font but ITALIC.

focusCellFont = Get_Property( @window : ".TABLE_1", "FOCUSCELLFONT" )
focusCellFont<1,1,4> = 1 ; * Italic
focusCellFont = Set_Property( @window : ".TABLE_1", "FOCUSCELLFONT", focusCellFont )
```
