

FOCUSRECTCOLOR

Applies to

Edit table.

Description

Defines the color of the rectangle drawn around the cell with focus.

Usage

```
gFocusRectColor = Get_Property (editTable,"FOCUSRECTCOLOR")  
sFocusRectColor = Set_Property (editTable,"FOCUSRECTCOLOR", color)
```

Remarks

Values passed in Set_Property():

Value	Description
color	An RGB value. The default value is 0 (black).

Returns

Values returned by Get_Property and Set_Property

Value	Description
gFocusRectColor	Returns the current rectangle color.
sFocusRectColor	Returns the rectangle color of the cell prior to the setting of the new color.
