

FOCUSRECTSTYLE

Applies to

Edit table.

Description

Defines how the focus rectangle is drawn around the cell with focus.

Usage

gFocusRectStyle = **Get_Property** (*editTable*, "FOCUSRECTSTYLE")

sFocusRectStyle = **Set_Property** (*editTable*, "FOCUSRECTSTYLE", *value*)

Remarks

Values passed in Set_Property():

Value	Description
0	The default dotted line.
1	A solid line.

Returns

Values returned by Get_Property and Set_Property

Value	Description
gFocusRectStyle	Returns the current rectangle style.
sFocusRectStyle	Returns the style of the cell prior to the setting of the new style.
