

FOCUSRECTWEIGHT

Applies to

Edit table.

Description

Defines the thickness of the rectangle drawn around the cell with focus.

Usage

gFocusRectWt = **Get_Property** (*editTable*, "FOCUSRECTWEIGHT")

sFocusRectWt = **Set_Property** (*editTable*, "FOCUSRECTWEIGHT", *value*)

Remarks

Values passed in Set_Property():

Value	Description
1	Light (1 pixel)
2	Medium (2 pixels)
3	Thick (3 pixels)

Returns

Values returned by Get_Property and Set_Property

Value	Description
gFocusRectWt	Returns the current rectangle weight.
sFocusRectWt	Returns the rectangle weight of the cell prior to the setting of the new style.
