

HPOSITION

Applies to

HScroll bar, Window.

Description

Returns or sets position of slide in a horizontal scroll bar. The scroll bar can be in a window, or can be a discrete scroll bar control.

Usage

position = **Get_Property** (*objectname*, "HPOSITION")

existingposition = **Set_Property** (*objectname*, "HPOSITION", *position*)

Remarks

position is an @FM-delimited array of:

Position	Description
<i>position</i> <1>	Current slide position.
<i>position</i> <2>	Least slide position.
<i>position</i> <3>	Greatest slide position.
<i>position</i> <4>	Slide increment (defaults to 1).
