

LABEL

Applies to

Edit table

Description

Text used as a heading for columns in an edit table control.

Usage

headinglabels = **Get_Property** (*edit_table1*, "LABEL")

existlabels = **Set_Property** (*edit_table1*, "LABEL", *LabelList*)

Remarks

Values passed in Set_Property:

LabelList @FM delimited list of column headings

Values returned by both [Get_Property\(\)](#) and [Set_Property\(\)](#):

headinglabels @FM-delimited list of existing column headings

existlabels List of column headings, when Set_Property was run. That is, the values before they were changed.
