

LIST EX

Applies to

(Hierarchical) list box.

Description

Returns or sets what the list would be if fully expanded.

Usage

itemlist = **Get_Property** (*objectname*, "LIST_EX")

olditemlist = **Set_Property** (*objectname*, "LIST_EX", *newitemlist*)

Remarks

The offset (indent) is indicated by the number of tab characters (Char (9)).

Values passed in Set_Property:

Value	Description
<i>Newlist</i>	Items to appear in the specified control.

Returns

Values returned by both Set_Property and Get_Property:

Value	Description
<i>Itemlist</i>	@FM-delimited array of items.
