

ORIG_SIZE

Applies to

All controls, and system control

Description

Returns the original size and position of the specified control.

Usage

objectsize = **Get_Property** (*objectname*, "ORIG_SIZE")

Returns

Values returned by Get_Property()

Value	Description
objectsize	x:@FM:y:@FM:w:@FM:h
existingprop	Size and position, when Set_Property was run.

Get_Property returns x:@FM:y:@FM:w:@FM:h, where:

Value	Description
x	Offset from the left side of the window.
y	Offset from the top of the window.
w	Width (rightward extension) of the control.
h	Height (downward extension) of the control, where the top of the control is the y position.

The ORIG_SIZE property for SYSTEM returns:

Value	Description
<1>	Screen width
<2>	Screen height
<3>	Maximum window client area width
<4>	Maximum window client area height

Warning! Do not apply the ORIG_SIZE property using the SIZE property. This will make a control invisible and will cause a window to display minimized.
