

# PART

## Applies to

Database associated controls.

## Description

If the control is linked to a key field which is a multi-part key, returns which part of the key this control is linked to. Used with `Get_Property` only.

## Usage

*partnum* = **Get\_Property** (*controlID*, "PART")

## Returns

0 if control is not linked to a key field, or if not a multi-part key.
