

PREVIOUS

Applies to

Interactive controls.

Description

With `Get_Property`, returns the previous object in the controls tabbing order for the window. With `Set_Property`, sets the previous object in the controls tabbing order for the window. The reference point is from the specified control.

Use this property to dynamically restructure the tab order.

Usage

`previousstab = Get_Property (objectname, "PREVIOUS")`

`existingprop = Set_Propertyb(objectname, "PREVIOUS", objectname)`

Remarks

Values passed in `Set_Property`:

Value	Description
<i>objectname</i>	Control name to be prior in the tab chain.

Returns

Values returned by both `Get_Property` and `Set_Property`:

Value	Description
<i>previousstab</i>	Name of control that occurs just prior, in the tab chain.
<i>Existingprop</i>	Previous tab control, when <code>Set_Property</code> was run.
