PREVIOUS

Applies to

Interactive controls.

Description

With Get_Property, returns the previous object in the controls tabbing order for the window. With Set_Property, sets the previous object in the controls tabbing order for the window. The reference point is from the specified control.

Use this property to dynamically restructure the tab order.

Usage

```
previoustab = Get_Property (objectname, "PREVIOUS")
existingprop = Set_Propertyb(objectname, "PREVIOUS", objectname)
```

Remarks

Values passed in Set_Property:

Value	Description
objectname	Control name to be prior in the tab chain.

Returns

Values returned by both Get_Property and Set_Property:

Value	Description
previoustab	Name of control that occurs just prior, in the tab chain.
Existingprop	Previous tab control, when Set_Property was run.
