

PSSTYLE

Applies to

All Controls

Description

A Get_Property only property that returns the current Presentation Server style for a control.

Usage

psStyle = **Get_Property** (*objectname*, "PSSTYLE")

Returns

Value returned by Get_Property.

Value	Description
<i>psStyle</i>	A hexadecimal value of the current Presentation Server style, in the format 0xNNNNNNNNN.

Example

```
Declare function Get_Property, Set_Property

* retrieve the PSSTYLE property of a LIST control.

* If the LISTBOX control contains the default properties, the PSSTYLE property should return 0x0.

* If the LISTBOX control has the "ANCHORRIGHT" property set then the PSSTYLE property would return 0x1000.

psStyle = Get_Property(@window: ".LIST_1", "PSSTYLE")
```
