ROWDATA

Applies to

Edit table.

Description

Fills or retrieves the current row of the edit table as an **@FM-delimited** array of cells. Use in an edit table event, such as the Changed event or the PosCha nged event, to retrieve or to change the data in the edit table.

Usage

rowdata = **Get_Property** (*objectname*, **"ROWDATA"**)

oldrowdata = **Set_Property** (*objectname*, **"ROWDATA"**, *newrowdata*)
