

# ROWLIMIT

## Applies to

Edit table.

## Description

Set and retrieve number of allowable rows within an edit table.

**Note:** Setting the ROWLIMIT will not alter existing data in a existing table. It will only limit the number of rows that may be inserted into an existing table.

## Usage

`rowLimit = Get_Property (objectname,"ROWLIMIT")`

`existingLimit = Set_Property (objectname, "ROWLIMIT", value)`

## Remarks

Values passed in Set\_Property():

Value	Description
Value	The number of allowable rows in an edit table.

## Returns

Values returned by Get\_Property and Set\_Property

Value	Description
rowLimit	The current number of allowable rows in an edit table.
existingLimit	The number of allowable rows prior to the setting of the new value.

## Example

```
rowLimit = Get_Property(CtrlEntID, 'ROWLIMIT')
existingLimit = Set_Property(CtrlEntID, 'ROWLIMIT', 10)
```
