

# ROWSHADE

## Applies to

Edit table.

## Description

A boolean property that will paint alternating edit table rows in different colors.

## Usage

*rowShade* = **Get\_Property** (*objectname*, "ROWSHADE")

*existingRowShade* = **Set\_Property** (*objectname*, "ROWSHADE", *bValue*)

## Remarks

Values passed in Set\_Property():

Value	Description
bValue	Boolean true (1) or false (0)

## Returns

Values returned by Get\_Property and Set\_Property

Value	Description
rowShade	the Boolean status of the control's rowshade.
existingState	the Boolean status of the control's rowshade, when Set_Property was run.

## Example

```
Declare function Get_Property, Set_Property

/* retrieve the ROWSHADE property of the TABLE_1 control and if true set to false and vice versa. */

rowShade = Get_Property(@window:'.TABLE_1','ROWSHADE')
if rowShade then
    newShade = 0
end else
    newShade = 1
end
existingRowShade = Set_Property(@window:'.TABLE_1','ROWSHADE',newShade)
```
