

THEMED

Applies to

SYSTEM and all controls.

Description

Determines if the desktop is using themes.

Usage

themed = **Get_Property** ("SYSTEM", "THEMED")

Returns

True if a themed visual style is in use. False if a themed visual style is not in user.

Example

```
If the workstation being used has a theme chosen and the following command is executed:  
themed = Get_Property("SYSTEM", "THEMED")  
then  
The themed variable will contain 1.
```
