

TOPPOS

Applies to

Edit table, list box.

Description

Indicates the position of the top-most visible item in a list box, or the top and left-most visible cell in an edit table.

Usage

topitem = **Get_Property** (*objectname*, "TOPPOS")

Returns

Values returned by Get_Property are:

Control	Value
Edit Table	A multivalue position in the format COL : @fm : ROW.
List Box	A single value position.
