

# UDPLIST

## Applies to

All controls.

## Description

This property provides a method of obtaining a list of user-defined properties for a control.

## Usage

*UDPs* = **Get\_Property** (*objectname*, "UDPLIST")

**Note:** *Only for use with the Get\_Property function.*

## Returns

An @fm delimited list of user-defined properties.

## See Also

## Example

```
declare function dcount

UDPs = Get_Property(CtrlEntId,'UDPLIST')

numUDPs = dcount(UDPs,@fm)
ctrls = str(ctrlentid:@fm,numUDPs)

swap @fm with @rm in ctrls
swap @fm with @rm in UDPs

values = Get_Property(ctrls,UDPs)
```
